

VP Series Pneumatic Pumps

On the surface, pneumatic pumps all appear to be the same. This just isn't the case with the Viridian America pump.

Precision machining using more noble materials, a design that is lighter and minimizes air leaks resulting in lower maintenance intervals can simply not be the same as the others!

With corrosion resistant components, high performance float, and epoxy resin outer casing, the Viridian America pneumatic pump is the most durable pneumatic pump available on the market today.

Typical applications include:

- Vertical extraction wells
- Landfill gas extraction wells
- Condensate sumps
- Recovery wells at remediation sites

Capabilities & Options:

- Available in 4", 3" and 2" Sizes
- Bottom or top inlet configurations
- Low draw down models
- Standard ultra-durable epoxy resin fiber-glass casing
- Optional 316 Stainless Steel casing
- Quick and easy disassembly for routine cleaning and maintenance
- Weighs less than the competition
