All PNEUMATIC PUMPS might seem the same.

They are not all DESIGNED or MANUFACTURED the same.

The #1 Pneumatic Landfill Pump!

Viridian America's line of pneumatic pumps are the choice of many landfill managers and operators for low flow, vertical pumping applications. Not only are they the most affordable, they might just be the most reliable air-powered environmental pumps, period.

The rugged, corrosion resistant design is just as suited to pump wastewater or gas condensate as it is highly corrosive leachate at elevated temperatures. The range of sizes and inlet variations can satisfy most any liquid recovery application.

Improving PERFORMANCE and QUALITY through continuous INNOVATION

Differentiators:

- High Performance Molded Float For Less Scale Build-up
- Epoxy Resin Outer Casing For Long Term Structural Strength
- Round Bottom Dome To Ease Installation
- More Noble Materials For Increased Chemical Resistance
- Machined Head For Reduced Corrosion Potential
- Rocker Arm Design For Enhanced Strength & Longer Life
- Non-Penetrating Rocker Arm Pins To Prevent Air Intrusion
- Non-Contact Magnets For Smooth Surface And Reduced Fouling
