

Heavy Duty Tank Seals

EPG's Heavy Duty Tank Seals are an effective and reliable way to seal storage tanks. Thick molded rubber is sandwiched between two metal plates and placed within the tank opening. As the stainless steel clamping bolts are tightened, the molded rubber expands to create a tight and sure seal. EPG's Tank Seals also provide a high strength supporting platform for suspending vertical pumps and help to facilitate easy pump removal.

- Corrosion resistant
- Electroless nickel plated cast iron
- Stainless steel bolts
- Bolt retainer clips
- 2 each cable hole with FNPT
- 3/4" rubber seal
- High strength
- Easy to handle
- Designed to fit into and sit on standard 6", 8", 10", and 12" SCH40 pipe
- Sizes available:
 - 6" x 1", 6" x 1 1/4", 6" x 1 1/2"
 - 8" x 1 1/2", 8" x 2", 8" x 3"
 - 10" x 2", 10" x 3", 10" x 4"
 - 12" x 3", 12" x 4"
