EPG manufactures custom engineered, field-tested, cost-effective solutions to environmental pollution problems using some of the most trusted brands in the industry.

Are you in the market for top of the line remediation parts or components?

Why not leverage EPG's buying power?

We can provide your next vacuum pump, blower, filter, compressor and more at competitive prices with the technical knowledge and support EPG is known for.

Our experience and understanding enable us to offer you and your clients custom solutions to environmental pollution problems both large and small.

Some of the EPG remediation equipment incorporating these components are shown below.
