# Royal Flex Discharge Hose

The Royal Flex Discharge Hose is a chemical and heat resistant helix type hose used in liquid pumping, suction, and discharge of water and slurries applications.

This hose features a thermoplastic vinyl nitrite tube and ribbed cover. This discharge hose is more crush and kink resistant and can withstand higher working pressure (up to 300 psi applications). It is lightweight, flexible and comes in longer lengths.

## SERVICE TEMPERATURE

-20° F to 180° F
