EPG Connection Newsletter

In this edition of the EPG Connection newsletter we are highlighting EPG's full line of Flares for Odor Control & Fugitive Gas and previewing our presence at the 2017 SWANA Landfill Gas & Biogas Symposium!

EPG's Service School is approaching. We are looking forward to seeing everyone, sharing knowledge, experience, and best practices to improve your operations and maintenance programs at your site.

> Thanks for reading and have a great day! LTL Biogas Flares

LTL Biogas Flares are widely used for odor and emission control when vacuum assist is required, such as cap vents, leachate stations, or from gas outbreaks at the surface of active or closed landfill cells.

feature solar-powered continuous ignition with very low maintenance requirements. Skid and trailer mounting options are available to adapt to any situation. Standard Flare Features:

These units are ruggedly constructed for long life and

Column Design • Solar or Line Powered Electronic Ignition - LPG Flame Pilot Also Available

Easy Assembly and Maintenance with Pivoting

- 5-750 SCFM Biogas Combustion Capacities
- Excellent Combustion Efficiency
- High Temperature Thermocouple with Programmable Data Logger
- Low Pressure, Easy Cleaning Flame Arrester Constructed with Aluminum Body
- and 304 Stainless Steel Internals • Carbon Steel Riser Pipe
- Hot Dip Galvanized
- Skid or Trailer Mounted; Easily Portable
- Complies with 40 CFR 60.18
