Protect Your Investment with Minimal Cost!

Breakout Junction Boxes

Control failure and expensive repairs due to landfill gas and moisture are real and potentially dangerous possibilities. To simplify maintenance & repair and improve the safety and accuracy of your system, install EPG Breakout Junction Boxes between your pumps and control panels.

Breakout Boxes provide a simple and convenient way to disconnect power or sensor wires during maintenance or repair work. When used in conjunction with properly installed seal-offs, they create a gas-tight seal isolating the riser, well or sump from the control panel.

EPG manufactures styles to accommodate Power Leads, Level Sensors, Float Switches, Flow Sensors, Probes, Leak Detectors and more.

[See Popular Models Here](#)

Reason to use breakout boxes:

- Prevent migration of landfill gas into the control panel
- Simplify installation and maintenance
- Increase overall safety of the pump and control system
- Reduce operation problems
- Reduce replacement costs
- Increase life of sensors, controls and pumps

[Learn More](#)

Breakout Boxes aren't just for new pumps & controls. You can add them to existing systems to help prolong their life and improve safety as well!

Lake Charles, LA (The Reich Co. Exhibiting)

July 28-30 SWANA Florida Summer Conference

Tampa, FL (EPG / Diamond Scientific Exhibiting)

Aug 26-29 Wyoming Solid Waste & Recycling Conf.

Sheridan, WY (The Reich Co. Exhibiting)

September 10-12 North Dakota Solid Waste & Recycling Assoc.

Bismarck, ND (EPG Exhibiting)

Oct 01-03 Kansas SWANA Solid Waste Mgmt. Conf.

Mulvane, KS (The Reich Co. Exhibiting)

Oct 21-24 2019 WASTECON

Phoenix, AZ (EPG / Viridian America Exhibiting)

More About Our Exhibiting Partners Above

Diamond Scientific is a verified VA-VOSB, HUBZONE Certified, DOT-DBE Company providing; EPG pumps, controls, and solar spark flares, and other environmental solutions. Working with engineering companies, landfill operators, biogas, waste water, and remediation companies.

Diamond Scientific has published numerous blog articles about landfills, pumps and more. Read them [here](#).

ENVIRONMENTAL & PROCESS EQUIPMENT

Reich Company, Inc. was founded in 1975 as a manufacturers representative for environmental treatment equipment. Reich Company works with only the top performing manufacturers who employ the latest technologies available in the market place.

We understand the issues related to our clients, and work with them to properly identify their needs and apply quality equipment and processes to meet and exceed requirements.

We can work with you to service a project from the early phase process selection through start-up with both engineering consultants and end-users.
