

EPG Would like to wish each of you a Happy Thanksgiving!

Company News

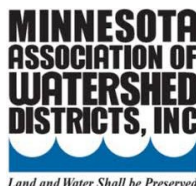

EPG is known for designing industry leading pump systems for landfill leachate removal and various other environmental applications. For several years now, we have also been supplying pumps, sensors, and controls for innovative surface water treatment & flood control solutions such as Iron-Enhanced Sand Filter Systems used to improve water quality. These systems feature our economical and efficient AF Series pumps, providing high volume, low head performance.

Contact EPG to learn more about integrating EPG's Pumps & Controls into your storm water management systems.
