"NW" Series Disconnect Adapters

Also known as pitless adapters, EPG's very own NW Disconnect Adapters are designed to fasten through landfill risers or sump walls. Personnel can easily and safely connect or disconnect pumps without entering hazardous locations.

Through continued R & D and testing, EPG is able to bring improved guide rail system designs to market. Innovative features such as adjustable and pivoting brackets allow a tailored fit for each and every application challenge our customers face.

Heavy Duty Guide Rail Disconnects

EPG's Heavy Duty Guide Rail Disconnects are constructed from high quality materials for long life and durability. Designed to be used with top discharge submersible pumps, they allow for easy connection and disconnection in most basin/sump applications.
