

Complete Remediation Solutions from EPG 1-800-443-7426

The EPG Connection

Your Resource for Landfill, Environmental, and Industrial Solutions!

March 2021

Issue No. 128

In this edition of the **EPG Connection** newsletter:

- **On-Demand Webinar - Remediation Solutions by EPG**
- **Remediation Solutions - Equipment Spotlight**
- **Event Calendar - Yes, In-Person Conferences :)**

Thanks for reading and have a great day!

EPG On-Demand Webinars

This Months On-Demand Webinar

Topic: [Remediation Solutions](#)

Length: [9:15](#)

In this short video we discuss EPG's effective lineup of Remediation Equipment & Solutions.

Remediation Solutions

Environmental remediation involves the cleanup of contaminated ground water and/or soils. Today, common methods of remediation include air strippers, product recovery pumps, soil vapor extractors, air spargers, and dual phase extraction systems just to name a few.

EPG's remediation systems are economical, mobile, and customized to your specific application. Today we highlight those systems and the industry leading components that help make those systems reliable and effective.

Quality Components

EPG manufactures custom engineered, field-tested, cost-effective solutions to environmental pollution problems both large and small using some of the most trusted brands in the industry.

You can leverage EPG's buying power when in the market for your next vacuum pump, blower, filter, compressor and more. We offer competitive prices, experience, and technical knowledge and support only EPG can provide.

Air Strippers

EPG offers low-profile tray air strippers for removal of volatile organic compounds (VOCs) from liquids.

They are used effectively for treatment of contaminated groundwater and process water.

[Learn More](#)

SVE Blowers

Soil Vapor Extraction, the removal of volatile organic compounds (VOCs) from soil using vacuum, has proven to be a highly efficient and cost-effective method of in-situ soil remediation.

[Learn More](#)

Condensate Filter Separators

The CS Series Condensate Separator is designed for removal of both particulates and liquid droplets from air streams. The unique up-flow design passes the air stream through a mixed media coalescer filter element which coalesces fine liquid vapor into larger droplets which, by gravity, drop to the bottom of the sump. This design extends the life of the filter.

[Learn More](#)

Air Sparge Equipment

Air sparging is often used in conjunction with vapor extraction for in-situ soil remediation. This process involves injecting pressurized air into the water table in order to strip volatile organic compounds (VOCs) by mass transfer.

[Learn More](#)

Oil/Water Separators

The OS Series Oil/Water Separators are designed to produce an effluent concentration of 10 mg/l or less of oil droplets 30 micron and larger of non-emulsified, free and dispersed oils.

The FLOPAK coalescing media allows readily settleable solids to be removed.

Trailer / Container Systems

EPG's Portable Remediation Trailers are so convenient! You can drive it in, hook it up, and be up and running the very same day. That's one of the advantages of using an EPG custom-built, trailer-mounted mobile remediation system. They're start-up ready! That means your mechanical and electrical installation time and costs are minimal and when the site is cleaned up, they can easily be moved to the next location, ready for power supply hook-up and connection to process piping.

These same solutions can be placed inside shipping containers for equally flexible, long term installations.

"Our remediation trailers give you superior soil and groundwater clean up wherever you want and when you want, while being a safe, completely enclosed system." - Jim Bailey, EPG Applications Specialist

Rental Units

EPG also rents several remediation solutions!

- Thermal Oxidizers
- Blowers
- Portable SVE (Soil Vapor Extractors)
- Air Sparge Compressors

These units are perfect for temporary, short term installations and pilot studies.

If you have any questions about the products and solutions listed above, please call EPG at 1-800-443-7426.

Upcoming Events

EPG will have representation at the following SWANA and industry related events:

Apr 6-7 SDSWMA Spring Solid Waste Workshop
Rapid City, SD (EPG Exhibiting)

May 25-27 MsSWANA Magnolia Chapter Conference
Biloxi, MS (The Reich Co. Exhibiting)

Jul 11-13 Missouri Waste Control Coalition Conference
Ozark Beach, MO (The Reich Co. Exhibiting)
