Comprehensive Training

EPG Service School is a 4 day class where experienced specialists guide you from basic electrical and pumping concepts to advanced techniques for operation, troubleshooting, and maintenance of pumps & controls systems.

Practical Topics & Discussion

Learn why you need a good ground and how to achieve it. Understand the impact landfill gas can have on operations & equipment integrity and how to mitigate those effects. You'll also have an opportunity to exchange ideas and experiences with your peers!

Valuable Hands-On Time

Live control panels allow you to program level & flow meters and install & troubleshoot components. You will also tear down and rebuild electric and pneumatic pumps to help you gain an advantage when performing your duties in the field.

Topics Include:

Use of Test Meters
Motor & Electricity Basics
Level & Flow Meters
Pump Basics
Pump Controllers

Control Panels
Installation & Start-Up
Operations & Maintenance
Grounding
Safety Issues

Telemetry
Arc Flash / SCCR
Flare Maintenance
Pneumatic Pumps
The Effects of Landfill Gas

For more than 20 years, EPG has served over 500 attendees in a small group setting. Our education and training classes are suitable for those involved with the design, maintenance, and/or installation of Liquid or Gas Handling Systems.
