Custom Fabrication

EPG has over 30 years of fabrication experience. This includes stainless steel weldments in the form of piping, tees, elbows, and flanges for liquid and vapor flow applications. This expertise ensures that we deliver top-quality welded components that meet your application-specific requirements. We practice time-tested techniques, ensuring welds are strong, durable, and long-lasting.

: a unit formed by **welding** together an assembly of pieces

Large Scale Weldments

The weldments pictured here include 8", 6", and 4" stainless steel flanges, elbows, and tees specially designed for a vapor extraction system.

This particular weldment (above) incorporates sweeps to help minimize turbulence.

Below is a render of the assembled Vapor Extraction system with the pictured weldments in place.

Small Scale Weldments

Offset Discharge Pipe ,SS, with 1-1/2" FNPT inlet, and 1-1/2" MNPT

This Offset Discharge Pipe was designed to be used with a 3/4 HP Vertical SurePump. The offset allowed for optimum alignment with the discharge pipe at the sump.

From custom pump discharge accessories to large-scale remediation skids and trailers, EPG can deliver a solution suitable for you.
